WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut two blanks 260 x 296 mm. Heights below are up from the bottom edge;
'toward the row' and 'toward the dock' are along the 260 mm edge.
Axle holes 12 mm, 90 each side of centre, 116 up.
Lower plate only: brush shaft hole 22 mm on the centre line, 135.5 up.
Stop button hole 22 mm, 95 toward the row, 265 up.
Bearing bolt holes: drill through the bought flange bearings once they are centred on the axle and brush holes.
Hook slider: two 6.5 mm holes 13 each side of centre, 40 up.
Cleat holes 6.5 mm, 37 each side of centre, 240 and 270 up.
Housing flange, clevis, bracket and seat holes: drill through each part in place, 3.3 mm, and tap M4 (marked from the part).
The upper plate is the mirror image, without the brush hole.
Deburr; round the corners 3 mm. Check: axle holes 180 apart.
