WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A folded tray, open toward the plate: 236 long, 165 tall, 40 deep, with a 12 mm flange on each end that screws to the plate.

Mark the blank: back 236 x 165; top and bottom walls 40 deep; end walls 40 deep plus the 12 mm flanges. Relief holes 3 mm at each corner. Fold the walls 90 degrees, then the flanges outward.

Drive motor: 8 mm shaft hole 90 toward the row, 41 up from the bottom edge; motor screw holes from the motor's datasheet.

Brush motor (lower only): 10 mm shaft hole on the centre line, 122 up; screw holes from its datasheet.

Flanges: three 4.5 mm holes each, 6 from the outer edge.

Upper housing: 79 tall, 1.5 mm sheet, drive motor hole only.

Check: the tray sits flat on the plate all round its rim.

DUSTRUNNER

github.com/BoujeeEnjinia1701/dustrunner

DustRunner drive housing (lower; the upper is 79 tall): making sketch
