WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut a strip 22 wide x 69 long. Fold 90 degrees at 20 and 49 mm to make a U: back 29 tall, two arms 20 deep.

Drill one 8.5 mm hole through both arms, 17 from the outside of the back, on the centre line (drill the arms together).

Two 4.5 mm holes in the back, 8 from each end.

Fit: back flat on the plate's inner face, 60 each side of centre, from 50 to 79 up; M4 screws into the plate.

The 22 x 23 mm roller goes between the arms on an M8 bolt, head up, nyloc nut below.

Check: the roller turns freely and stands 6 mm off the plate.
