WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Slider: 40 x 30 mm from 10 mm plate.
8 mm reamed hole on the centre line, 15 up from the bottom.
Two slots 6.5 wide x 14 tall, 13 each side of centre, centred 15 up: chain drill and file.
Axe: 8 mm silver-steel rod 51 long, pressed 10 mm into the slider with retaining compound; e-clip groove at the far end.
Seat: 3 mm sheet 30 wide, folded to an angle with an 18 mm leg on the plate and a 9 mm shelf; two 4.5 mm holes.
Fit: slider on two M6 shoulder bolts through the plate, free to slide up and down; spring between seat and slider.
Spring: about 9 mm across, 60 N at 20 mm long (about 3 N/mm).
Check: the slider moves 8 mm by hand without binding.

DUSTRUNNER
