WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

One blank, folded twice: a 27 x 62 mm leg that screws to the plate; a 46 x 38 mm wing folded 90 degrees at the dock end; a 27 x 30 mm shelf folded 90 degrees at the top.

Leg: two 4.5 mm holes, 13 in from the dock end, 12 and 52 up.

Wing: holes for the robot contact block (three copper strips on an 8 mm insulating block) on its dock-facing side.

Shelf: 7 mm hole for the latch pin, 15 from the dock end, 17 in from the plate; solenoid screw holes from its datasheet.

Fit: on the lower plate's inner face at the dock end, 168 to 230 up.

Check: the pin drops through the shelf without rubbing.
