WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 2,334 mm long, ends square (the module length plus 56).

For another module length, cut to that length plus 56.

Ends: two 6.5 mm holes across both side walls, 17 from each end, 25 and 55 up from the bottom face (for the cleat bolts).

Bottom face: five M5 rivet nuts on the centre line, 328, 788, 1,167, 1,546 and 2,006 from the lower end (hood spacers).

Top face: four M5 rivet nuts 12 each side of the centre line, 266 and 660 from the lower end (sunshade posts).

Top face: holes for the controller box screws, 523 and 633 from the lower end, to suit the box.

The 80 mm side stands normal to the glass.

Check: length within 1 mm; end holes square across.
