WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut four 70 mm lengths; deburr.

Leg on the beam: two 6.5 mm holes, 17 from the face that sits on the plate, 20 and 50 from the bottom end.

Leg on the plate: two 6.5 mm holes, 17 from the corner (outside), 20 and 50 from the bottom end.

Drill each pair of cleats together so the holes match.

Fit: one cleat each side of each beam end; one M6 bolt across the beam through both cleats at each hole, and two M6 bolts through each cleat into the plate.

Check: the beam end sits square and tight on the plate.
