

REV	DESCRIPTION	DATE	BY
P1	Making sketch for the prototype build plan	2026-09-30	AC

WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Core: cut 2,218 mm of 50 x 2 tube; ends square, deburred.

Plugs (2): turn 46 mm outside, 20 long, 20 mm bore, from 50 mm bar; press into each core end flush, retaining compound and two M5 screws through the tube into each plug.

Upper shaft: 20 mm steel, 76 long; 20 into the upper plug.

Lower shaft: 120 long, 20 mm for 83 (20 in the plug), then 15 mm for 37 at the outer end, with a 5 mm key flat.

Press both shafts into the plugs with retaining compound.

Slide on the microfiber sleeve (2,198 long), 10 in from each core end; a hose clip on each end holds it.

Check: spin it between centres: run-out under 1 mm.
