WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Sunshade: 120 x 410 mm from 1 mm sheet, corners rounded.

Four 5.5 mm holes, 12 each side of the centre line, 8 in from each short end.

Posts (4): 12 mm tube, 100 long, ends square.

Fit: an M5 screw 120 long through the shade and each post into the rivet nuts in the beam's top face.

The shade stands 6 mm above the pack, so air moves under it.

Check: the shade is level and clears the pack and box.
