WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Clamp bar: 40 x 6 flat bar, 165 long.

8.5 mm holes on the centre line, 20 from the dock end and 7.5 from the module end.

Jaw: 40 x 40 from 6 mm bar; 8.5 mm hole 32.5 from its inner end. Spacer: 15 x 40 from 2.5 mm sheet, same hole.

Fit: the bar under the first module's long-side frame flange, the jaw on top of the flange inside the frame, the spacer beside the flange edge; one M8 bolt pulls them together.

The dock end of the bar bolts down onto the near cross member.

No drilling of the module.

Check: the clamp cannot slide when pushed by hand.
