P1	Making sketch for the prototype build plan	2026-09-30	AC

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut three 540 mm lengths.
6.5 mm holes top to bottom on the centre line, 20 from each end, to bolt onto the far and rail-start cross members.
Two of them carry the dock panel: drill 6.5 mm holes to match the panel frame's mounting holes.
Fit: lying flat (40 wide) on top of the cross members, 110, 610 and 2,148 up the slope from the lower module edge.
Check: both panel ties are parallel within 1 mm.
